

```
git checkout 8692d1
```

```
// Let's make some water
```

## // MinTuts/Procedural Terrain.shader

```
float b = 0;

if (p < 0.01) {
    g = 0;
    b = 1;

    y = float3(1, 1, 1);
}

return float4(y * float3(r, g, b), 1);
```

The goal of this commit to change the black color when **p** is very close to 0 to blue - so we have water instead of darkness
